For as long as I can remember photography has been a love of mine. It wasn't until I endured a career-altering event that I decided to pursue my passion. I enrolled in the *Oklahoma School of Photography* and graduated with a diploma in photography/lab techniques. My training included theory and practical hands-on experience in a wide variety of photographic techniques that incorporated both traditional film and digital media. While in school, I was honored for maintaining an "A" average and awarded 3<sup>rd</sup> place in the *action* contest for my entry "Strumming".

My studio *A Skittlz Production Photography* is dedicated to great customer service and exceeding client expectations. I am a creative and energetic person with a good work ethic that strives to capture special moments through photography. Along with a studio setting, my abilities allow me to work in any environment desired by my clients. I enjoy working with people in different places and believe this flexibility will keep customers coming back.

Giving back to the community, especially children in need, is important to me. Therefore, I will continue to volunteer my photography services to worthwhile organizations such as MDA, Habitat for Humanity and Wilson Elementary, which helps underprivileged children participate in sports.
