Valerie Horsch

valleygirl33@hotmail.com

I started my career as a Digital Imagist by attending *Oklahoma School of Photography* where I graduated from the Digital Imaging program in 2005. While in school I received honors for superior attendance and maintaining an "A" average. My training included technology, theory and hands-on experience.

My goal as a Digital Imagist is to provide clients with high quality, professional work that they will use and enjoy.

I feel my work is inventive, creative and unique. I am reliable and dedicated to getting a job done right. I care about the quality of my work, and strive to give clients what they are looking for.
